

TOP 10 NEW CAPABILITIES OF

MicroStation CONNECT Edition

1

Automated Sheets

Automate sheet creation, layout, indexing, and more

6

Item Types

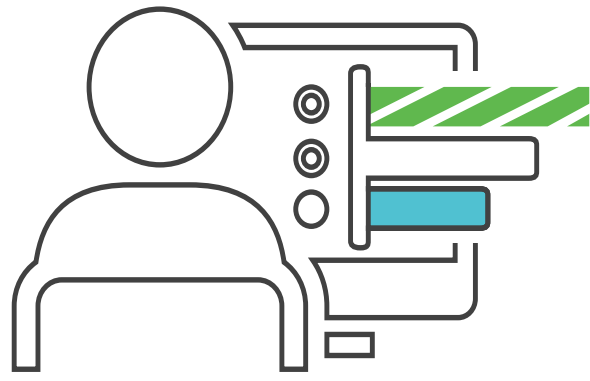

Create, manage, and share picklists for item properties

2

Property-driven Drawing Production

Use object properties to automate reporting, annotations, and symbology

7

Powerful Search

Use the new search bar to find *anything* or get help

3

Functional Components

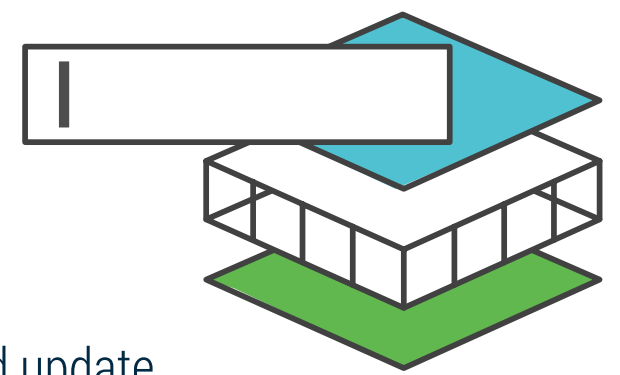

Create flexible parametric components with pre-defined variants

8

Text Favorite Manager

Standardize text fields and update properties as elements are modified

4

Constraint-based Modeling

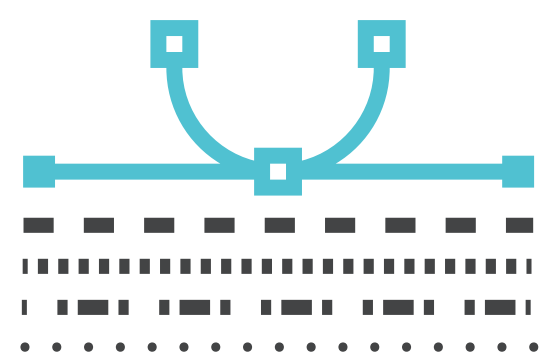

Use persistent constraints to ensure design intent

9

2D/3D Line Styles

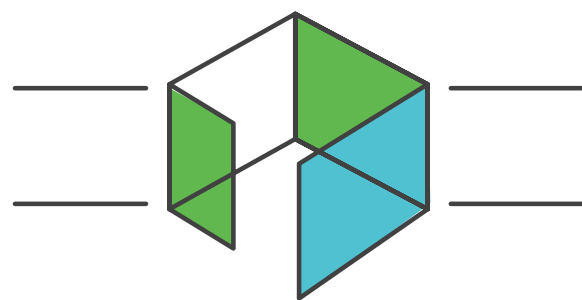

Customize 2D/3D line styles for design detail and clarity

5

Parametric Solids and Surfaces

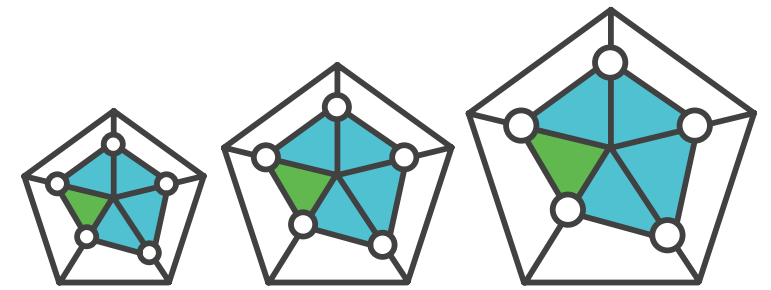

Speed modeling tasks with integrated parametric modeling workflows

10

Scalable Meshes

Integrate real-world context with reality meshes

You get all these **new capabilities** along with a **streamlined UI**, **more powerful computing**, **reality modeling**, and more!
